Why automate lifecycle?

 **Efficiency and Time-Saving**

 **Consistency and Accuracy**

 **Security**

 **Compliance**

 **Scalability**

Key Steps – Policies and routines

1

Access Policies: Define who gets access to what resources based on roles and responsibilities.

2

Approval Workflows: Establish workflows for approving access requests and changes.

3

Deprovisioning Policies: Set clear guidelines for revoking access when users leave the organization.

Key Steps – Tools and portals

Identity Management Solutions: Use tools like Microsoft Entra ID to automate user lifecycle management.

Integration with HR Systems: Integrate with HR systems to automatically trigger the processes based on employment status changes.

Self-Service Portals: Provide self-service options for users to request access or report issues.

Key Steps – Control and training

Regular Audits: to ensure that the automation processes are working as intended.

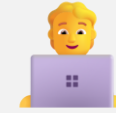

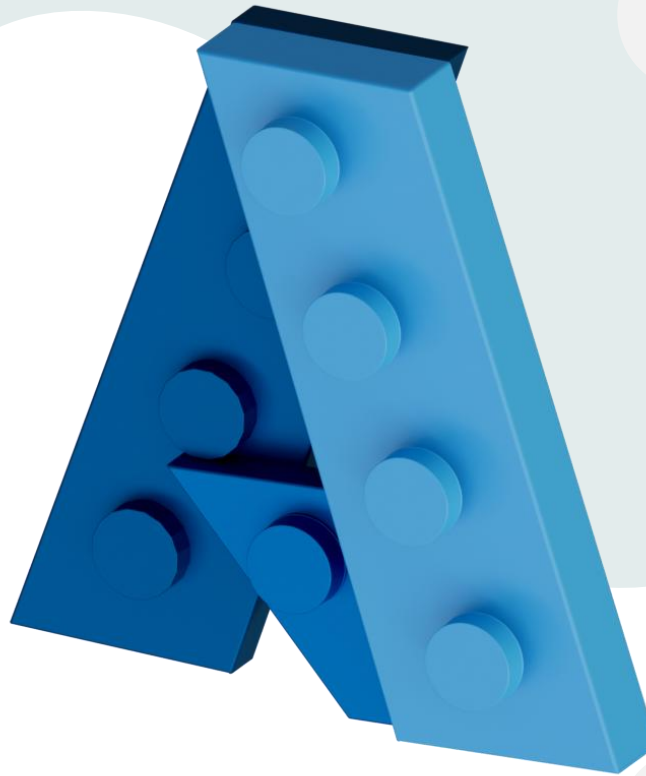

Real-Time Monitoring: Implement real-time monitoring to detect and respond to any anomalies or security incidents.

IT Staff Training: Provide training for IT staff to manage and troubleshoot the automation tools.

What tools?

For automating and maintain a secure and effort less identity we need to combine several tools that gives us automation and governance out-of-the box

Entra ID

Cloud based identity and access management service that helps organizations manage access to resources securely.

Lifecycle workflows

An identity governance feature that automates management tasks based on joiner-mover-leaver lifecycle

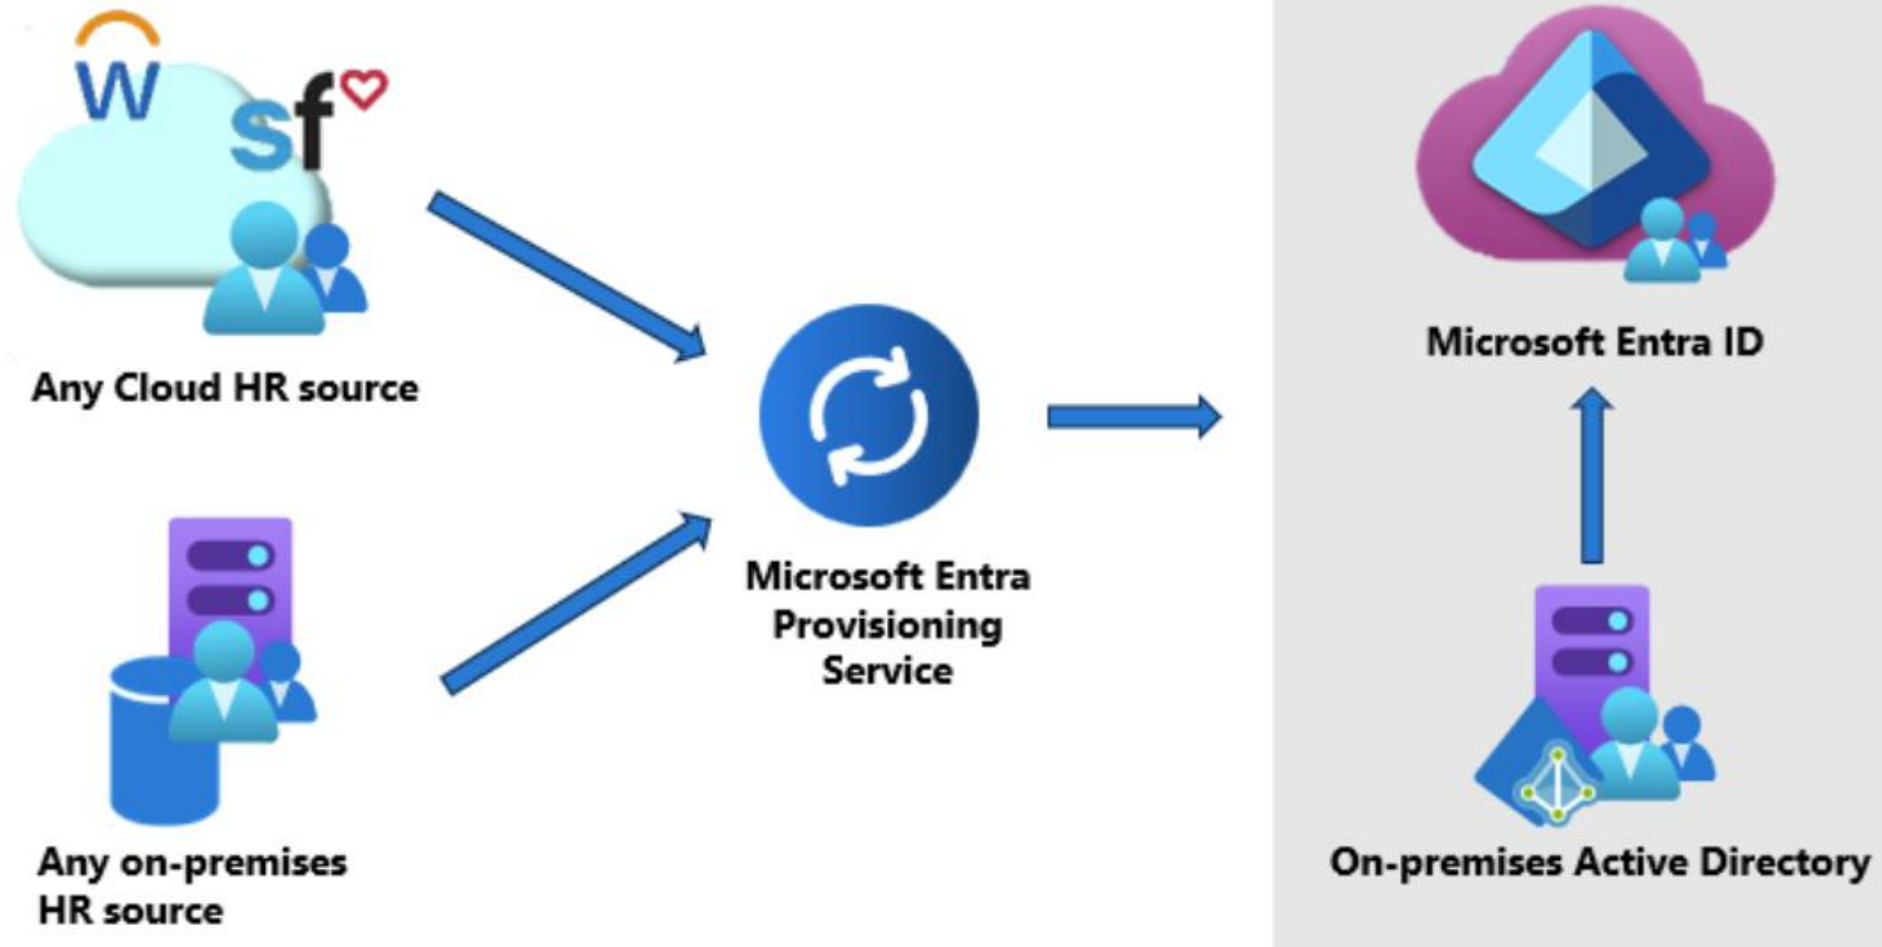

Entitlement Management

A governance feature that automates the management of user access to resources. It handles requests, assignments, reviewer and expiration of access

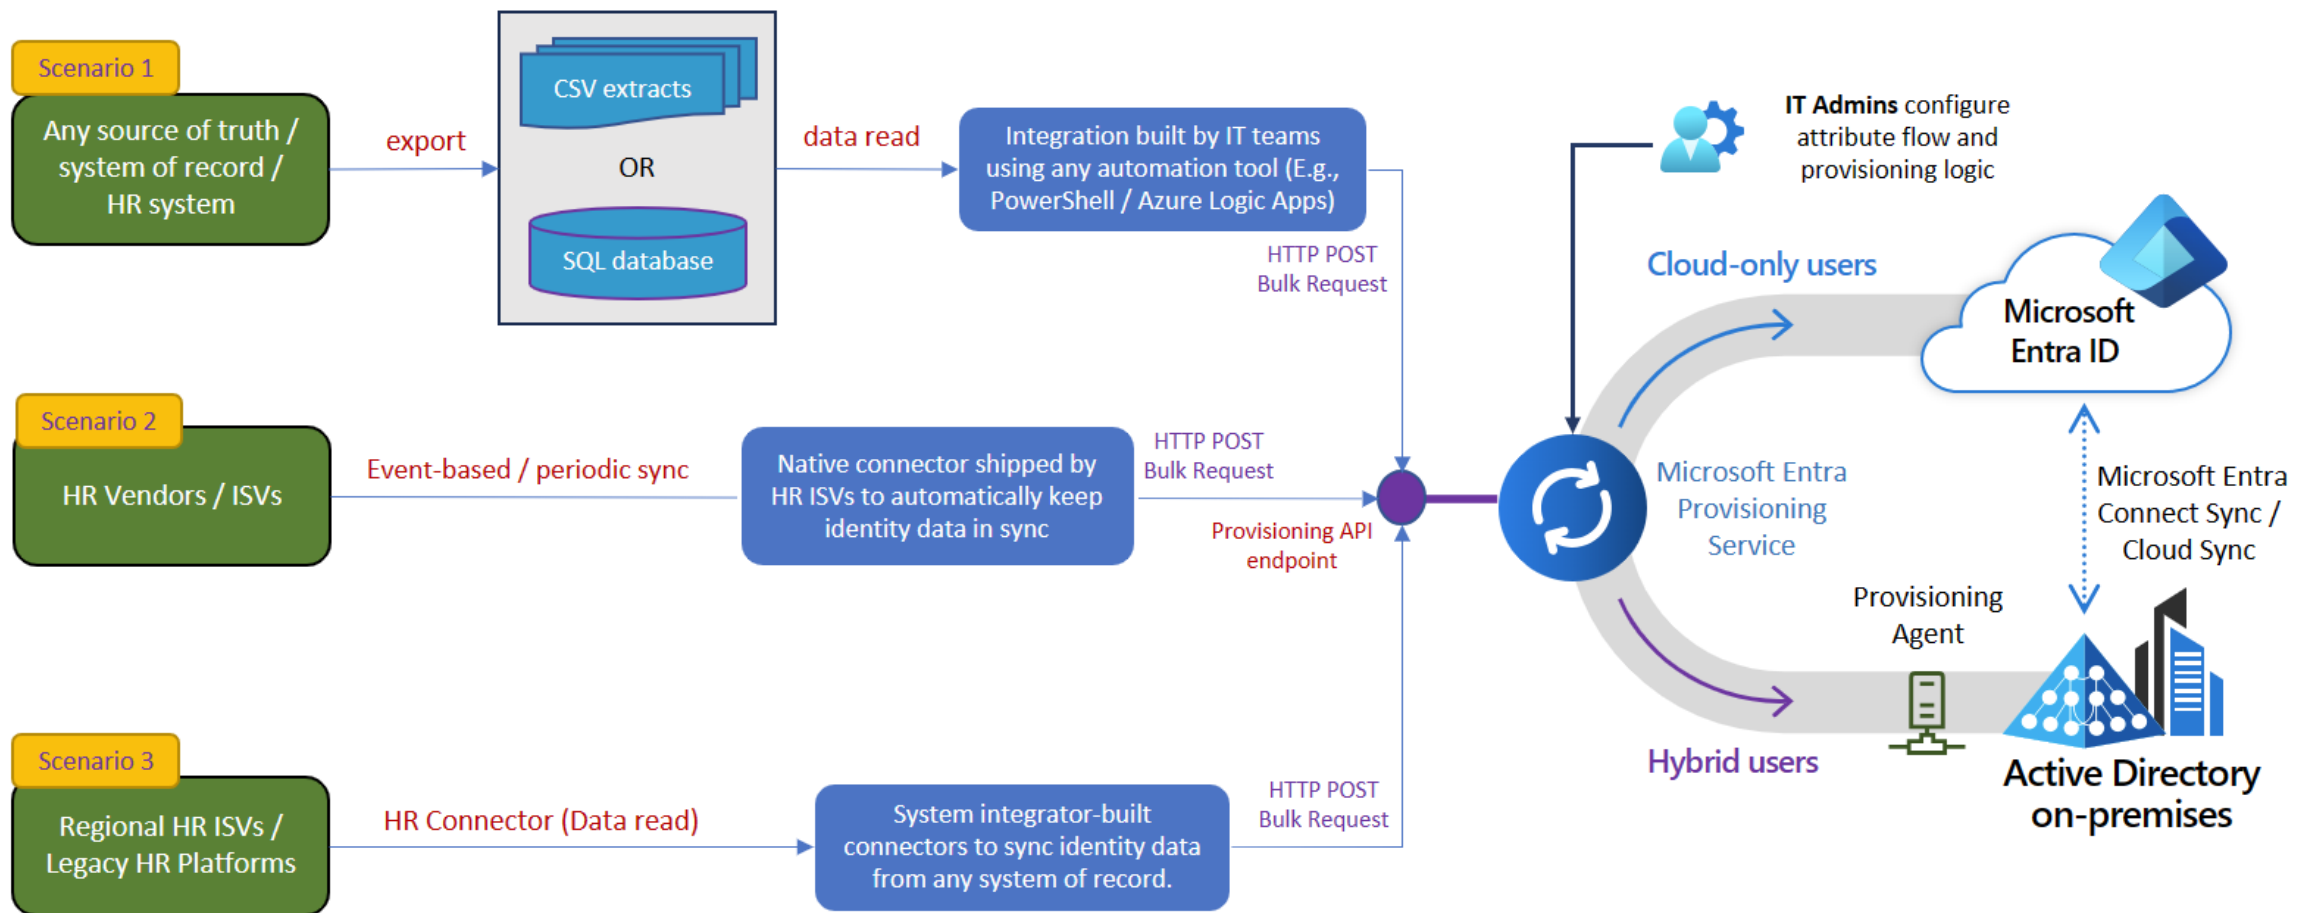

Licensing spesific for lifecycle

**DEMO
TIME!**

What we covered today

User creation

With the use of SharePoint Lists, Forms and Power Automate flows we can create a Entra ID user.

User Lifecycle

When we have Entra ID Lifecycle Workflows we can manage several onboarding steps that usually are manual steps.

Access Management

Access Package is really convenient!! We use it to give access, approve access, review access and remove access – what a power tool!

Automation

With extension both to Lifecycle workflows and Access Packages we can automate even more! Only your imagination can stop you!
